

MES ASMABI COLLEGE, P.VEMBALLUR

Policy on Extension and Outreach Programmes

MES Asmabi College has long been dedicated to its extension programs, involving the active participation of all students by adhering to the institution's Policy on Community Extension and Outreach Activities. The college originates from a commitment to marginalized communities in the coastal rural area of Kodungallur and has contributed to the upliftment of the people through education and secularism. The institution has been using its resources, including its infrastructure, expertise, knowledge, skills, and personnel, to enhance the neighbourhood's welfare since then. All the extension and outreach programs instill a sense of social responsibility and environmental sustainability among students, and all the departments and clubs make this a mandatory commitment to society. The long-term link with local self-governments and the development of best practices through experiential learning and outreach activities involving students for the benefit of the community serve as evidence of our successful trajectory in extension and outreach activities.

The following are the general provisions based on the college's vision to instill ethical and social values among students, enabling them to become socially responsible citizens of the country.

- Ensure 100% student participation in extension activities
- Organizes welfare programs under NSS, NCC, Swachh Bharat, Nature Club, Bhoomithra Sena, women's cell, Anti-Drug Awareness Drives and involves all departments to ensure community-village engagement with adopted villages, Nearby schools, PHC and local bodies with a focus on gender equality and environment protection, among other initiatives.

- Conducts Seminars, Webinars, Onsite Visits, and Day Observances to raise awareness of social issues
- Ensure mandatory Student Social Service for six days per academic year as part of the curriculum
- Organizes various sessions and counseling facilities for the community to enhance mental health
- Ensure the construction of at least one house per year for a needy person among the students or in the neighborhood.
- Implement environmental protection and conservation programs
