The slide content is as follows:

- ▶ Phytochemical investigation of a plant may this involve extraction of plant material, preliminary phytochemical screening, separation and isolation of constituents and characterization of the isolated compounds.
- ▶ Methods of extraction are different in phytochemical analysis they are **plant tissue homogenization, serial exhaustive extraction, maceration, decoction, infusion, digestion, percolation, sonication** etc. We can use appropriate methods for extraction.
- ▶ Qualitative and quantitative analysis will be done using different tests and techniques. Important techniques are **Gas Chromatography Mass Spectrometer (GCMS), High Performance Liquid Chromatography(HPLC)and High Performans Thin Layer Chromatography(HPTLC).**
- ▶ For the detection of the phytochemicals **UV Spectroscopy, IR Spectroscopy, Mass Spectroscopy, Nuclear Magnetic Resonance Spectroscopy. (NMR) and X-Ray Crystallography** are frequently used.
