5.2 GT-QL- Adoption of green technology (details to be provided)

5.2.1 Write on green technology adopted in your institution in not more than 500 words

MES Asmabi College has adopted green protocol since 2012 and this has become mandatory for the last five years with the approval of the staff council in which waste management is an important activity. There are 'Ecobins', usually twin bins made of paper cartoons as twin bins for collection of paper and plastic wastes in every classroom, office and common facilities. This is maintained by the student every year as an activity. The collected waste are transferred through similar waste bins in all the corridors and finally to the segregation room where paper, plastic, e- waste are segregated and sent for recycling regularly and the income collected is given to the sweepers as an incentive. There are proper sewage mechanisms for every common facility and labs and the hazardous chemicals are collected in the underground tank. E-wastes are collected and given to centers as directed by the state government. The college has been audited for the green activities especially the waste management system by the Suchithwamission team of Government of Kerala and given A grade with 95 points this year and certified as Green Campus. The green initiatives of the college organized various environmental awareness programmes in each Department of the college as part of World Environment Day celebrations. Recently a vermicomposting unit was started by Botany Department of MES Asmabi College.
