OBSERVATION OF RESULTS FOR THE LAST FIVE YEARS

OVERALL OBSERVATION

The data shows that academic results have generally improved each year. There was a big jump of 10% from 2017 to 2018, followed by smaller but still positive increases of 4% in the next year. Even during challenges like the COVID-19 pandemic, there was still a small increase of 1% in 2019-2020. The trend continued with another 5% increase in 2020-2021, showing that the education system can adapt and overcome obstacles. While there was a dip of 10% in 2021-2022, it's seen as a chance to learn and improve rather than a setback. This highlights the importance of always looking for ways to make education better.
