

## **MES Asmabi College**

### **OBC Cell - Annual Report-2021-22**

In the wake of the resumption of offline classes post the COVID-19 pandemic, MES Asmabi College organized a crucial awareness program titled "Scholarships: All You Need to Know" on 2nd December. This initiative aimed to empower and inform students about various scholarship opportunities available to them. After the shift from online to offline classes following the pandemic, it was essential to reorient students, especially those from diverse backgrounds including the Other Backward Classes (OBC), about available financial aid and scholarship programs. The objective was to ensure that every eligible student could access these opportunities. A detailed presentation was delivered, showcasing various scholarships available from government bodies, NGOs, corporate sectors, and other sources. This included merit-based scholarships, need-based aid, and specialized grants for specific fields of study. The program successfully disseminated comprehensive information, enlightening students about a plethora of scholarship opportunities available to them. The "Scholarships: All You Need to Know" awareness program served as a catalyst in equipping students with vital information, thereby enabling them to make informed decisions and actively pursue available scholarship opportunities. It fostered a sense of inclusivity and empowerment among students from various backgrounds, ensuring that financial constraints did not hinder their educational aspirations.
