

Report on the Su-Rakshayanam PACE Program at SCMS School of Engineering and Technology

Date and Venue

Date: 10/09/2024

Venue: SCMS School of Engineering and Technology, Koratty, Kerala

Resource Person

Lathif Penath conducted a key session on Traffic Psychology.

Objective of Session

The Su-Rakshayanam PACE program, organized by KTU and the Kerala Police, aimed to promote better driving behavior among college students. The objective was to educate and train students on safe driving practices and traffic psychology.

Event Summary

The Su-Rakshayanam PACE program was a two-day residential camp held at the SCMS School of Engineering and Technology. The program focused on enhancing driving behavior among college students through a series of interactive and practical sessions.

A highlight of the program was the session on Traffic Psychology conducted by Lathif Penath. This session utilized interactive methods and simulation model training to provide students with a comprehensive understanding of safe driving practices and the psychological aspects of driving. The training aimed to foster better awareness and responsible behavior on the road.

Key organizers included representatives from KTU and the Kerala Police, who collaborated to ensure the program's success. The camp featured various activities, including workshops, seminars, and practical training sessions, all designed to reinforce the importance of safe driving.

Impact of the Session

Lathif Penath's session on Traffic Psychology had a significant impact on the students. The interactive approach and use of simulation models engaged the participants effectively, helping them to understand the real-world implications of their driving behaviors. Students reported increased awareness of safe driving practices and a better understanding of the psychological factors that influence driving.

Conclusion

The Su-Rakshayanam PACE program was highly successful in achieving its objectives. The interactive and practical nature of the sessions, particularly the one on Traffic Psychology, resonated well with the students. This program, organized by KTU and the Kerala Police, underscores the importance of educational initiatives in promoting road safety and

responsible driving behavior among young adults. The positive feedback from participants highlights the effectiveness of the program and its potential for wider implementation.
