

CREATIVE SKILL DEVELOPMENT

On the occasions of World Fisheries Day, open house of the Institute, the department of Fish Processing Technology IEDC students prepared models which are related to ocean conservation. A model of Aqua scaping by reusing the old Styrofoam pieces and PVC pipes. A group of students very actively involved in creative preparation of the models and their effort was successful. All the models are displayed in the department. The impact of this initiative includes increased student engagement in innovation and entrepreneurship, development of critical thinking and technical skills with some models evolving into viable products for startups and competitions.
